Slot Machines!

History of Online Slots

The first fully functional gambling software was developed by Microgaming. They basically invented the online casino, as well as first online slot machine in 1994.

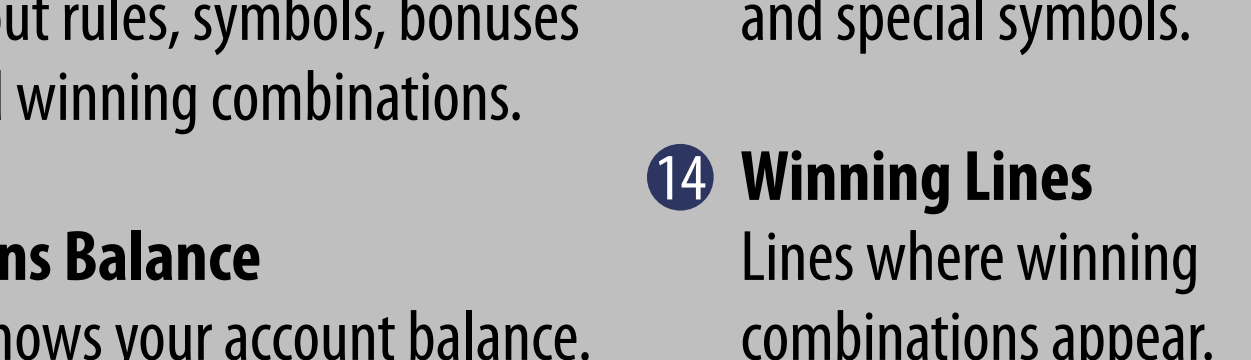

The first online slots looked like one-arm bandit slot machines with same 3 reels and one pay line, but it was the big step to being creating history of online gambling.

Sometime later online slots evolved into 5 reel (or more) slots with much more paylines, bonus features, awesome design and video effects.

Back in 2006, the term "3D Slots" first rose to the attention of most online casino gamblers thanks to Betsoft which developed and innovative line of more advanced slot machines that they referred to as 3D slots.

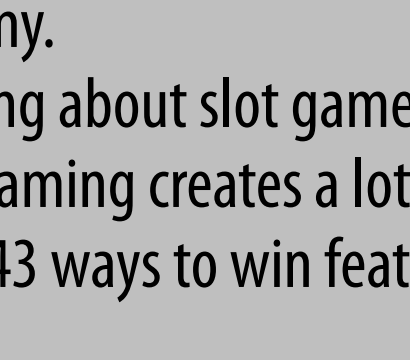

Instead of simply featuring static symbols and lifeless backgrounds, the 3D slots were filled with animations and moving parts. Characters moved around the screen, backgrounds came to life, and every win was accompanied by a short animated sequence that brought just a little extra fun to the game.

SlotMachine Game Types

Classic Slots
Traditional 3-reels one-armed, fruity, bar, bell bandit. The gameplay remains the same as it ever was in old-style slot machines.

Fruit Machines
The player spins three reels and, in the majority of cases, the symbols are comprised of the traditional icons like fruit, lucky 7s, bells, BARs, etc.

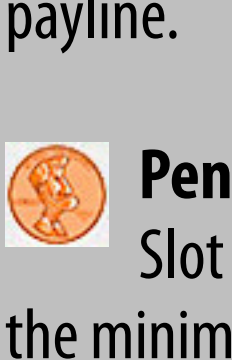

Video Slots
Typically containing 5 reels, these video slots contain animations when winning symbols are found on an active payline.

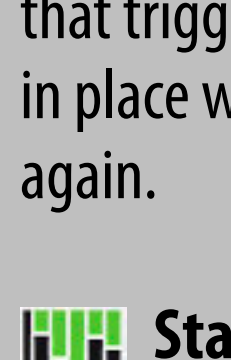

3D Slots
This kind of online slots are famous for fantastic 3D graphics and effects, that brings the game on a new level and leave one-armed bandits far away in the past.

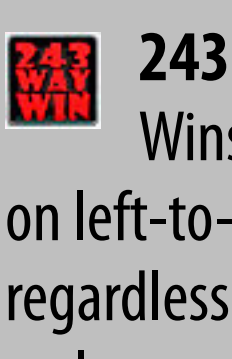

Online Slots Features

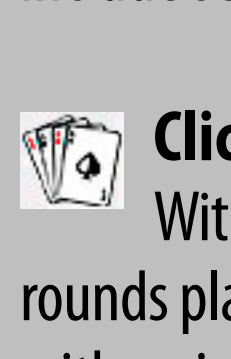

Free Spins
The bonus mode where you don't have to pay for spins. Everything you win is done without costing you a penny.

Scatter
It takes at least 2 or more scatters appearing anywhere on the screen at the same time to trigger some bonus game mode.

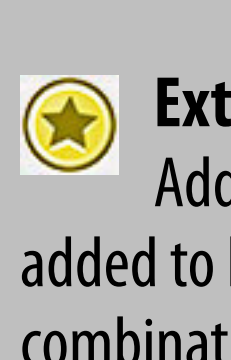

Gamble Feature
Kind of bonus game where you need to guess correctly next card color or suit and double your wins.

Multipliers
If a wild symbol completes a winning combo, you might win twice as much (2x) or five times as much (5x) the standard amount.

Bonus Rounds
Activated with scatters or wilds. Bonus game gives choosing until one of the choices craps out and forces you to return to the regular spin mode.

Shifting Reels
For every winning combination on a payline, a reel will shift to make more payline wins. In this slot the money bag symbol turns into a wild after the reels shift. Example: Merkur Ghost Slider.

Progressive Slot
The payouts grow exponentially the more players deposit. You can become an instant millionaire with just one click.

Sticky Wilds
This feature expands like an expanded wild symbol, but they remain behind for as long as you have free spins.

Wild Symbol
Wild symbols work by transforming themselves, as if by magic, into whatever symbol you need to create a winning slots payline.

ReSpins
When triggered (usually by 3 or more trigger symbols) the reels that triggered the re-spin are held in place while the other reels spin again.

Penny Slots
Slot machine games where the minimum acceptable bet can be as little as only 1 penny. This refers to more classic slots.

Stacked Wilds
As stacked wilds appear on a screen, the wild symbol expands to include several spaces on that reel.

243 Way to Win
Wins are calculated based on left-to-right combinations regardless of their position on each reel.

Click'n Pick
Within free spins or bonus rounds players will be presented with an instant win prize where players click on a particular image to collect on a mystery prize winning.

Expanding Wilds
An individual wild symbol that appears on a reel will expand to cover all the positions on that reel that will result in a winning payout.

Extra Symbols
Additional symbols are added to help make winning combinations, also they includes not only extra base game symbols but extra special symbols.
